## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-75 are rejected under 35 U.S.C. 102(e) as being anticipated by Fattouch, U.S. Patent Publication No. 2003/0078051.

Regarding claims 1-75, Fattouch discloses a method for enhancing wireless communications, said method comprising: measuring in real-time, interference metrics associated with links between a wireless communication node and a plurality of client nodes, and scheduling, based at least in part on said interference metrics, communications between said wireless communication node and said plurality of client nodes to reduce service level variability between said plurality of client nodes (0015-0025, 0075).

Fattouch discloses the use a plurality of channels in adjacent cells/service areas having inherent radiation patterns (figures 1, 4 and 5; 0073, 0074).

Fattouch discloses a downlink/uplink map to establish communications between the wireless node and the plurality of client nodes (0030-0032, 0114-0124).

Fattouch further discloses measuring instantaneous interference associated with client nodes in the cellular system by using "interactive" devices (0036-0041).

### ***Conclusion***
